

Insta-Valve 250™

10 and 12 inch F.A.Q.

Q. When will the 10"-12" Insta-Valve 250 be available to purchase?

- A **limited supply** of the new 10" and 12" Insta-Valve 250 valves will be available to order on August 1, 2016.

Q. Will I still be able to purchase the 10"-12" Insta-Valve Plus?

- The current style 10" and 12" Insta-Valve Plus will be available through December 1, 2016 or until inventory is depleted. Production of the current style 10" and 12" Insta-Valve Plus will decrease as inventory is depleted and demand decreases.

Q. Will the 10"-12" Insta-Valve 250 cost more than the 10"-12" Insta-Valve Plus?

- Yes, due to the incremental costs associated with manufacturing a 250 psi insertion valve the cost will be slightly higher than the 150 psi rated Insta-Valve Plus. The 10" Insta-Valve 250 list price will increase \$550 and the 12" Insta-Valve 250 will increase \$555. Hydra-Stop will continue to offer the Insta-Valve Plus through December 1, 2016 to cover any existing projects you have previously bid.

Q. Will my equipment require any modifications to use the new IV 250 valve?

- No modifications are required to install the Insta-Valve 250 in line pressures under 150 psi. Installing Insta-Valve 250 in line pressures above 150 psi may require a 250 psi tapping machine upgrade, 250 psi temporary gate valve and boring the ID of your aluminum P20 tapping housing. Contact your Regional Sales Manager or Inside Sales Representative if you plan to install the Insta-Valve 250 in line pressures above 150 psi.

Q. Is the 10"-12" classified to NSF 61/372?

- The 10" and 12" Insta-Valve 250 has been submitted for Underwriters Laboratory NSF 61/372 classification. The same materials used to manufacture our NSF 61/372 classified 4" through 8" Insta-Valve 250 are used to manufacture our 10" and 12" inch Insta-Valve 250. We expect classification by September 1, 2016.

Q. Does the IV 250 meet American Iron and Steel Act requirements (AIS)?

- Yes, all 10" and 12" IV250's shipped from Hydra-Stop meet the requirements of the American Iron and Steel Act.

Q. Is there a "Made in the USA" option for the 10" and 12" Insta-Valve 250? Can I order the valve with a stainless steel flange? What about domestic stainless steel hardware?

- Yes, there is a Made in the USA option for the 10" and 12" Insta-Valve 250. The 10" and 12" Insta-Valve 250 meets Made in the USA requirements by adding the stainless steel flange option and the domestic stainless steel hardware option. The cost of the stainless steel bonnet flange option is \$455. The cost of the domestic stainless steel hardware option is \$548 and includes the pin plugs and body and bonnet bolts, nuts and washers.

Q. Does the 10"-12" Insta-Valve 250 qualify for Hydra-Ship (same day shipping if ordered by 12PM CST)?

- The 10" and 12" Insta-Valve 250 will qualify for the Hydra-Ship program starting August 1, 2016 and will be available as inventory allows. The 10" and 12" Insta-Valve Plus will qualify for the Hydra-Ship program through December 1, 2016 or until Hydra-Ship inventory is depleted.

Q. Is there an alignment gauge available for the 10"-12" Insta-Valve 250?

- Yes - the 10"/12" IV 250 Alignment Gauge Kit is available for pre-order at a cost of \$385 and will begin shipping August 1, 2016.
