

# Hydra-Power

## HYDRA-POWER<sup>®</sup> HYDRAULIC POWER PACK from HYDRA-STOP

A turn key, portable hydraulic power unit designed to meet the demands of today's water works professional.

Rugged construction, dependability and outstanding performance. The turn-key, easy to setup **Hydra-Power** hydraulic power pack delivers both performance and value. The steel frame's lightweight design allows for portability while still adding strength and protection during day to day operation. The large oil reservoir keeps things cool, even when powering through a lengthy tap.

### Hydra-Power Features

- 13 HP electric start engine
- 12v battery rated to 230cca at 0deg
- Two 50 foot hydraulic hoses, 1/2" SAE 100R16 rated hose
- Three sets of quick connect hose couplings with dust caps
- 15 gallon hydraulic oil reservoir with in-tank filter kit
- Combination temperature and sight gauge
- Skid mounted with protective cage. Hydra-Power unit can be lifted with a forklift with or without straps

### Hydra-Power Specifications

Dimensions: 44 1/2 L X 24 1/4 W X 22 1/4 H  
Weight: 304 pounds (with full hydraulic tank and fuel load)  
Output: 9 GPM @ 1700-1800 psi.  
13 HP Electric Start engine  
Hydraulic oil recommendation: all purpose, petroleum based hydraulic oil, ISO Grade 32  
Normal operating oil conditions: 37-54C / 100-130F

Three sets of Quick Connects, with dust caps, are included.
