

HYDRA-VIEW

Pipeline Assessment Solution

Hydra-View Applications

- Valve Assessment
- Leak Detection
- Asset Location
- Condition Assessments
- Illegal connection identification
- Foreign Object Identification
- Water Quality Investigation
- Watermain Mapping
- Hydrant Lateral Inspections
- Air Entrapment Identification

Combine System Assessment with System Control

When a leak is suspected in your system, do you know exactly where it is located? Is the broken valve on Main Street stuck in the open or closed position? How many illegal connections are in my system? Finding answers to these questions used to be difficult **Not anymore.**

Hydra-View Pipeline Assessment Solution

Hydra-View is an under-pressure pipeline assessment solution which combines a tri-sensor inspection head (CCTV, hydro-phone and sonde) and real-time analysis software with the dependability of the Insta-Valve 250 Patriot® Insertion Valve. Hydra-View provides precision pipeline assessment and leak detection without shutting down your system.

Launched through the Insta-Valve 250 Patriot® Insertion Valve, Hydra-View operates in 4 - 12" diameter pipe and is capable of 300 feet of travel with a rated working pressure of 150 psi. After inspection, an Insta-Valve 250 Patriot® Insertion Valve remains in place, ready to act as a long-term control asset.

The Value of Data ... Optimize your ROI

Real-time data gathered during a Hydra-View pipeline assessment, provides critical knowledge about your distribution system. The data assists in both short and long-term decision making regarding pipeline asset management, capital planning and water loss control.

This data allows you to decide which projects require priority attention and those that can be planned for future consideration.

View Your System from the Inside

If you are concerned about the integrity of your distribution system, such as leak detection, water loss control, non-functioning valves - you owe it to yourself to contact Hydra-Stop to learn about the Hydra-View Pipeline Assessment Solution.

Put the power of the Hydra-View Pipeline Assessment Solution and the dependability of the Insta-Valve 250 Patriot® to work for you. Call us today at 866-566-6220 or visit us on the web at www.hydra-stop.com/solutions/pipeline-assessment/
